Story

Intergalactic Instacart is set in a far-flung Sci-fi future, where robots have taken over and colonized the many planets within and beyond the solar system. The player's character is a young and naïve human who is an independent courier contracted by the titular Instacart, a soulless corporate contract delivery service that operates on the margins of the Robot-dominated universe.

Couriers for Instacart are dropped off by a run-down rideshare spaceship onto one of the Robot's many colonial planets, tasked with delivering items to robot customers and engaging with alien enemies and haywire robots in order to complete their delivery docket.

After receiving a delivery, players can choose to deliver it to the customer to earn money or deliver it to a hacker to pay for decryption and obtain permanent combat skill upgrades or platforming skill upgrades.

Environment:

Ice Planet - Glacius Deliveron 6

Asha, a space courier, found herself stranded on the icy planet Glacius Deliveron 6. She had been sent there on a mission to deliver a package, but her ship had malfunctioned and crash-landed. Now, Asha must earn 1000 local currency before the end of the day to pay for repairs or risk being kicked off the planet.

To achieve her goal, Asha must navigate the treacherous terrain and complete various delivery tasks. However, she quickly realizes that the planet is filled with dangers, including hostile creatures and harsh weather conditions. To increase her chances of success, Asha teams up with a skilled hacker who can help her acquire useful upgrades.

Program

Starting Point:

- Spawn

End Point

- Customer

Requirement: Deliver the package to the terminal

Reward: Currency

- Hacker

Requirement: Currency

Reward: Permanent combat & platforming upgrades.

Enemies

Reward:

Temporary speed boosters.

- Melee
- Range
- Tank

Block the shortcut

Checkpoints

- Save the progress of the game, respawn area at key areas to avoid friction

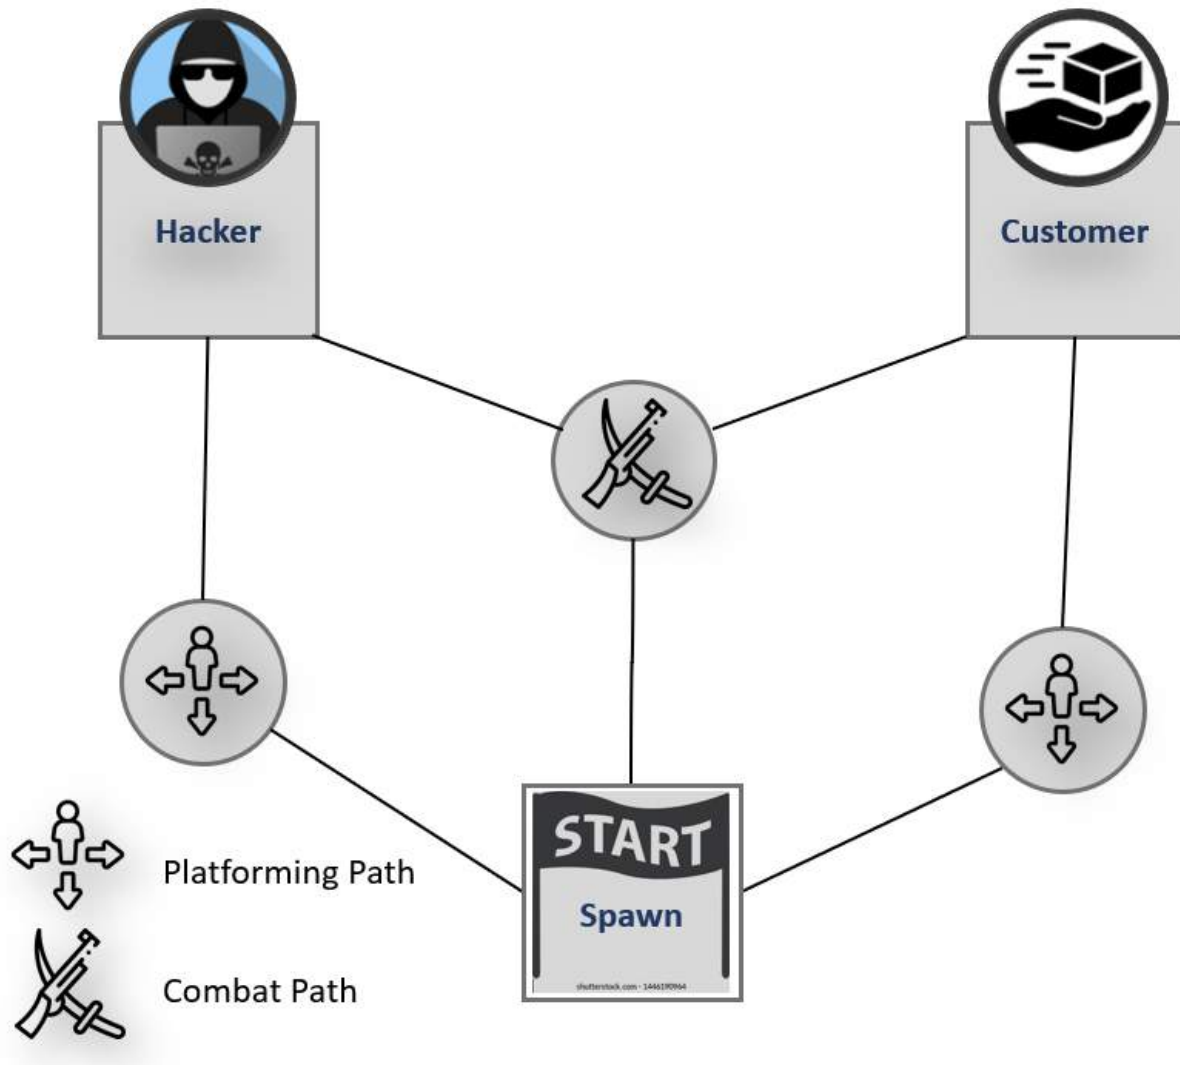

Shortcuts

Requirement: Platforming upgrades or defeat the Tank enemy

Reward: Saving time through creative locomotion

Diagrams

Flow Diagram - Options as presented to player

The basic flow of gameplay starts with the player at the spawn point, and are presented with multiple routes and to either the Hacker or the Customer (with the hacker being locked off for the first round).

Upgrade Selections

1.1 Upgrade Choices

Combat Upgrades

Platforming Upgrades

Freeze
Grenade

Flame
Thrower

Rocket Blast

Double Jump

Dash

Ground
Pound

When the player visits the Hacker, they can trade the credits they earn from successful deliveries to upgrade themselves. They are presented one choice for both **Combat** and **Platforming** upgrades, from a pool of 3 chosen randomly. They may return to the Hacker once they finish another delivery and choose again, with the power they had previously installed having been removed from its respective selection pool.

1.1.0 Speed Boost Drop - Battery

Description:

Batteries dropped by defeated enemies, can be retrofitted to Asha's augmentations to temporarily upgrade her leg boosters.

Functionality:

Enemies drop these at their feet upon death.

These items are consumed immediately when walked over, a temporary speed increase (3 seconds) is granted to the player. The player can chain multiple boosts together, resetting the counter, by keeping a steady stream of combat and collecting. The boost will be interrupted if the player is hit by an attack.

1.1.1 Hacker Upgrade - Combat - Ice Grenade

**Description:**

Enemies are slowed down or frozen in place

Functionality:

Can be used to reduce enemy speed and aids in the strategic positioning of enemies for powerup consumption.

1.1.2 Hacker Upgrade - Combat - FlameThrower

**Description:**

Immerse enemies in flames

Functionality:

Enemies take continuous damage and are likely to run away when lit, can be used to divert difficult enemies

1.1.3 Hacker Upgrade - Combat - Rocket Launcher

**Description:**

Explosive Area-of-Effect projectile that applies force for pushing/knockback enemies/player

Functionality:

Mid-High splash damage (reduced damage for player), can be used at one's feet as an additional boost.

1.2.1 Hacker Upgrade - Movement - Double-Jump

**Description:**

Jet propulsion allows an additional jump in the air to reach higher or further distances

Functionality:

Primarily: Access to sidelines/alternate paths

Incidental: Engage enemies differently

1.2.2 Hacker Upgrade - Movement - Dash

**Description:**

Backpack augmentation allows for a quick dash over a small distance.

Functionality:

Clearing gaps horizontally, speed boosts, melee/projectile dodging

1.2.2 Hacker Upgrade - Movement - Ground-Pound

**Description:**

Gravitational Hastener allows for quick vertical charge downward

Functionality:

Primarily: Allows for positioning and aids in air-control
Secondary: Alternative melee attack

Player

Asha

Asha is a blue collar courier for **Intergalactic Instacart**, an AI-operated delivery service that provides item transport for AI-colonized planets in the Deliveron System. She grew up in a society that values efficiency and hard work, and where humans are trained to work minimum wage jobs. Based on their performance during their schooling, they are accepted into different companies, with the most competitive companies offering the highest benefits, pay, and living arrangements. Our protagonist is accepted into Instacart, one of the top companies in the galaxy.

At the beginning of the game, she is excited and passionate about her new job, as she has worked her whole life to earn this position. However, as she progresses in the game, she begins to discover that her dream job is not what she had envisioned. She meets new characters, visits new planets, and learns about her history, which challenges her way of thinking and view of the world. As a result, she starts to shift from a character that is obedient to a more rebellious one.

Itinerary Service Kit

The **Itinerary Service Kit (ISK)** is a crucial tool for the player, serving as a conduit for various forms of information. Not only does it serve as a direct line to **B4S1L**, Asha's AI Supervisor, but as a way to receive and confirm orders, and as a clandestine communication with **The Hacker**. Through this device, the player will be provided helpful tips and explanations of game mechanics, supplementing the level design in tutorialising the game.

Additionally, this device will provide guidance through the level and feedback for the player's progress via messages from **B4S1L** or **The Hacker**. Overall, the device serves as an essential aspect in the game's loop, providing a means of immersive guidance during Asha's quest on **Glacius Deliveron 6**.

Spawn Area

The player will enter and exit the delivery area via a hover shuttle bus, which will drop them off and pick them up. However, once they arrive at the delivery area, they will not have any other means of transportation. They will have to complete their delivery missions on foot due to the treacherous terrain.

NPCs

B4S1L

B4S1L is the highly advanced AI supervisor for managing **Asha's** assignments and tracking her progress. He is always looking for ways to optimize the value of his human workers while providing as little qualitative support as possible. **B4S1L** will provide guidance, tutorial information, and feedback to **Asha** via her **ISK** device. He will chide or congratulate Asha depending on the quality of her performance, as well as award Asha currency for her work.

The Hacker

The hacker is a mysterious character that hacks **Asha's ISK** signal at the beginning of the second delivery. The hacker invites the player their makeshift ta to crack the high-tech packages that Asha is delivering and takes a cut of the profits. The hacker provides **Combat Upgrades** and **Platforming Upgrades** in return for currency.

Customers

The Customers are Robot AI that operate inside the ice planet, they receive their orders from a pneumatic-tube-like wall apparatus that is connected to structures on the surface of the planet. Asha has never seen a Customer with her own eyes, as her only interaction with them is the confirmation she received from B4S1L after plugging the delivery pack into the socket.

Enemies

Melee Charger - “Boltcaster”

Class	Melee
Role	Forces Player Engagement
Characteristics	Tries to close distance to player
HP	Low
Damage Output	Low
Attack Type(s)	Melee
Dimensions	1x1.5
Mobility	Mid

Waddles like Penguin
AGGRESSIVE WADDLING

CHARGES at player for melee

Commits to charge line until
charge terminates

Melee Tank - “Yetifoot”

Class	Melee
Role	Barrier/Area Denial
Characteristics	Territorial, Physically blocks player until defeated
HP	High
Damage Output	High
Attack Type(s)	Melee
Dimensions	3x3
Mobility	Low (Slow)

Guards key
Areas to shape
pathing

Remains
in place

Melee Fighter - “Frostbite”

Class	Melee
Role	Area Control
Characteristics	Territorial, dominates key areas in path
HP	Mid
Damage Output	Mid
Attack Type(s)	Melee/Limited Range
Dimensions	1x2
Mobility	Mid

Extended
(however limited)
melee attack

Chases down
player upon
engagement

Engages player within
defined area

Ranged - “Scorpion Stinger”

Class	Ranged
Role	Forces player movement
Characteristics	Tries to keep a certain distance away from player and shoots projectiles at player
HP	Low
Damage Output	Low
Attack Type(s)	Ranged – Projectile that leaves small damaging floor effect
Dimensions	1x0.5
Mobility	high

Scoops snow

<- Single motion

Tosses projectile from scooper

Leaves damaging spikes behind, influencing player mobility

Stealth - “Wormouth”

Class	Stealth
Role	Pressure
Characteristics	Territorial, environmental, appears and disappears
HP	Mid/High
Damage Output	Mid/High
Attack Type(s)	Melee
Dimensions	2x2
Mobility	Mid

Emerges from ground to attack

Leaves behind environmental damage

Periodically appears to indicate or hint at an upcoming attack
